DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 01, 2005 has been entered.

Allowable Subject Matter

2. Claims 1-5, 8, 10, 11, 14-18, and 21-24 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The examiner has not found a method for operating a telecommunications system where a call is received on a first telecommunications system from an external telephone line wherein the first telecommunications system is coupled to both packet- and circuit-switched lines, and determining, at the first telecommunications system, that the call will be transferred to an auto attendant running on a second telecommunications system (auto attendant is distinguished from an office attendant, as explained in Applicant's arguments in the Amendment dated February 1, 2005, on page 14, paragraph 9 to page 15, paragraph 2), wherein the second telecommunications system (also coupled to both packet- and circuit-switched lines) is remote from the first telecommunications system, then determining the packet network address of the second telecommunications network, coupling the packet network address of the first telecommunications network to the second telecommunications network, switching data from the auto attendant process from the first to the second telecommunications network via the packet network, and then coupling the telephone call to the auto attendant on the second telecommunications network (wherein the first telecommunications network does not have an auto attendant).
